*55 1/2*

Age: .....

# Wilbert's Friends

I went from University into R&D with Ferranti then worked for IBM for many years before running my own company. I am also a small holding part-time farmer who loves cows, ducks and chickens...

Eventually Robert and I teamed together and have cut a successful path into an industry we know very well - Also I enjoy my job

**Graham W Auld**

I have been in the IT industry what seems to be forever. Notwithstanding I did take some time off mid 80's to mid 90's and went off to West Africa to be a missionary and lecture in theology for several years.

Since returning I have been working with Graham in the SME and the leisure market where we enjoy working with our customers who mostly are now also our friends.

**Dr Robert MB Harvey**

Entirely have a wonderful team that run behind the scene. It is headed up by Kieran and Robert (yes, another Robert).

They do a wonderful job of manning the help desk and keeping all the systems operating smoothly.

**His unsung hero's**

**Our company's** focus is always on the future. As a result children are the inspiration for our literature.

**Our team** at Entirely embraces the enthusiasm and vitality of youth and feed off their continuing quest for all things new and exciting.

**As a result** we can keep our clients future-proofed with up and coming technologies, and hopefully one step ahead of your competition, while also keeping you looking forward.

**Contact** one of our team on 0141 370 7200 to see how we can keep your systems from growing old!

# Connectivity

Wilbert felt totally confused by all the talk about cloud this and cloud that, he felt under attack by technology - the only answer is to seek out the wise old EO

Connectivity is key to running a business in the 21st century. But constantly people feel they are under attack. How do you know your systems are safe? Are you running the right product?

The world of business is going cloud based, and the choices available are growing by the month. As suppliers fight for their place in the market finding the right product at the right price is becoming harder for you the customer.

We specialise in supplying the right product to you be that ADSL; FTTC; FTTP; Cable; Leased Line; Mobile Data or even a Satellite.

Fortunately our team can speak fluent comms and will guide you through the onslaught of current jargon.

Call one of our team today on 0141 370 7200 and get connected.

# Email

Wilbert found juggling all the different bits of kit needed to do his work was hard.-  
he makes a mental note to seek out the wise old EO

Why would you want to have your email in the cloud?

In today's world, five minutes without email is too long, you may have lost the tender in that time. Being without email is a real pain, this is where the security and reliability of the cloud comes into its own.

Your email is spread across several servers using secure algorithms which bring security and freedom from hardware failure. But what does that really mean?

It's safer, more secure, cheaper and increases your online availability.

Whether it is email, telephones or data

Call one of our team on 0141 370 7200 and we will have you in the cloud in no time

# Virtual PBX

Wilbert could not get his head around a telephone system that was in the cloud - things are getting complicated He wonders if I can Google the wise old EO

Why would you want your telephone system in the cupboard in the back office. It sits there whirring away and is so limited in what it can fulfil in today's 21st century communications. It's time to get rid of that expensive maintenance contract.

A Virtual PBX (private branch exchange) gives you the opportunity for unified communications. In a nutshell this is where you can take calls on your desk phone, phone at home, mobile, tablet or laptop as though you were in the office. Wherever you have data communications you are available on your office extension.

You can have several virtual telephone numbers that can be local, national or international all pointing to your Virtual PBX

Call one of our team on 0141 370 7200 and they will explain all the ins and outs to unify your phone communication.

# Security

Wilbert finds himself under constant attack and he does not like it - the only answer is to seek protection with the wise old EO

In today's hackers paradise you are a target, you may think no-one will want to get your info or make your equipment their goal, but you would definitely be wrong.

Your information, equipment and your communications are a target for a variety of nefarious purposes deemed sellable by today's hackers.

Your communications are under a constant onslaught of prying eyes and algorithms trying to hack your communications and pry into your business.

We can help you put measures in place to reduce the exposure you and your communications are from being hacked, ransacked or becoming victims to ransomware.

Call our office on 0141 370 7200 and we can discuss how to shield you from the enemy without.

SLA

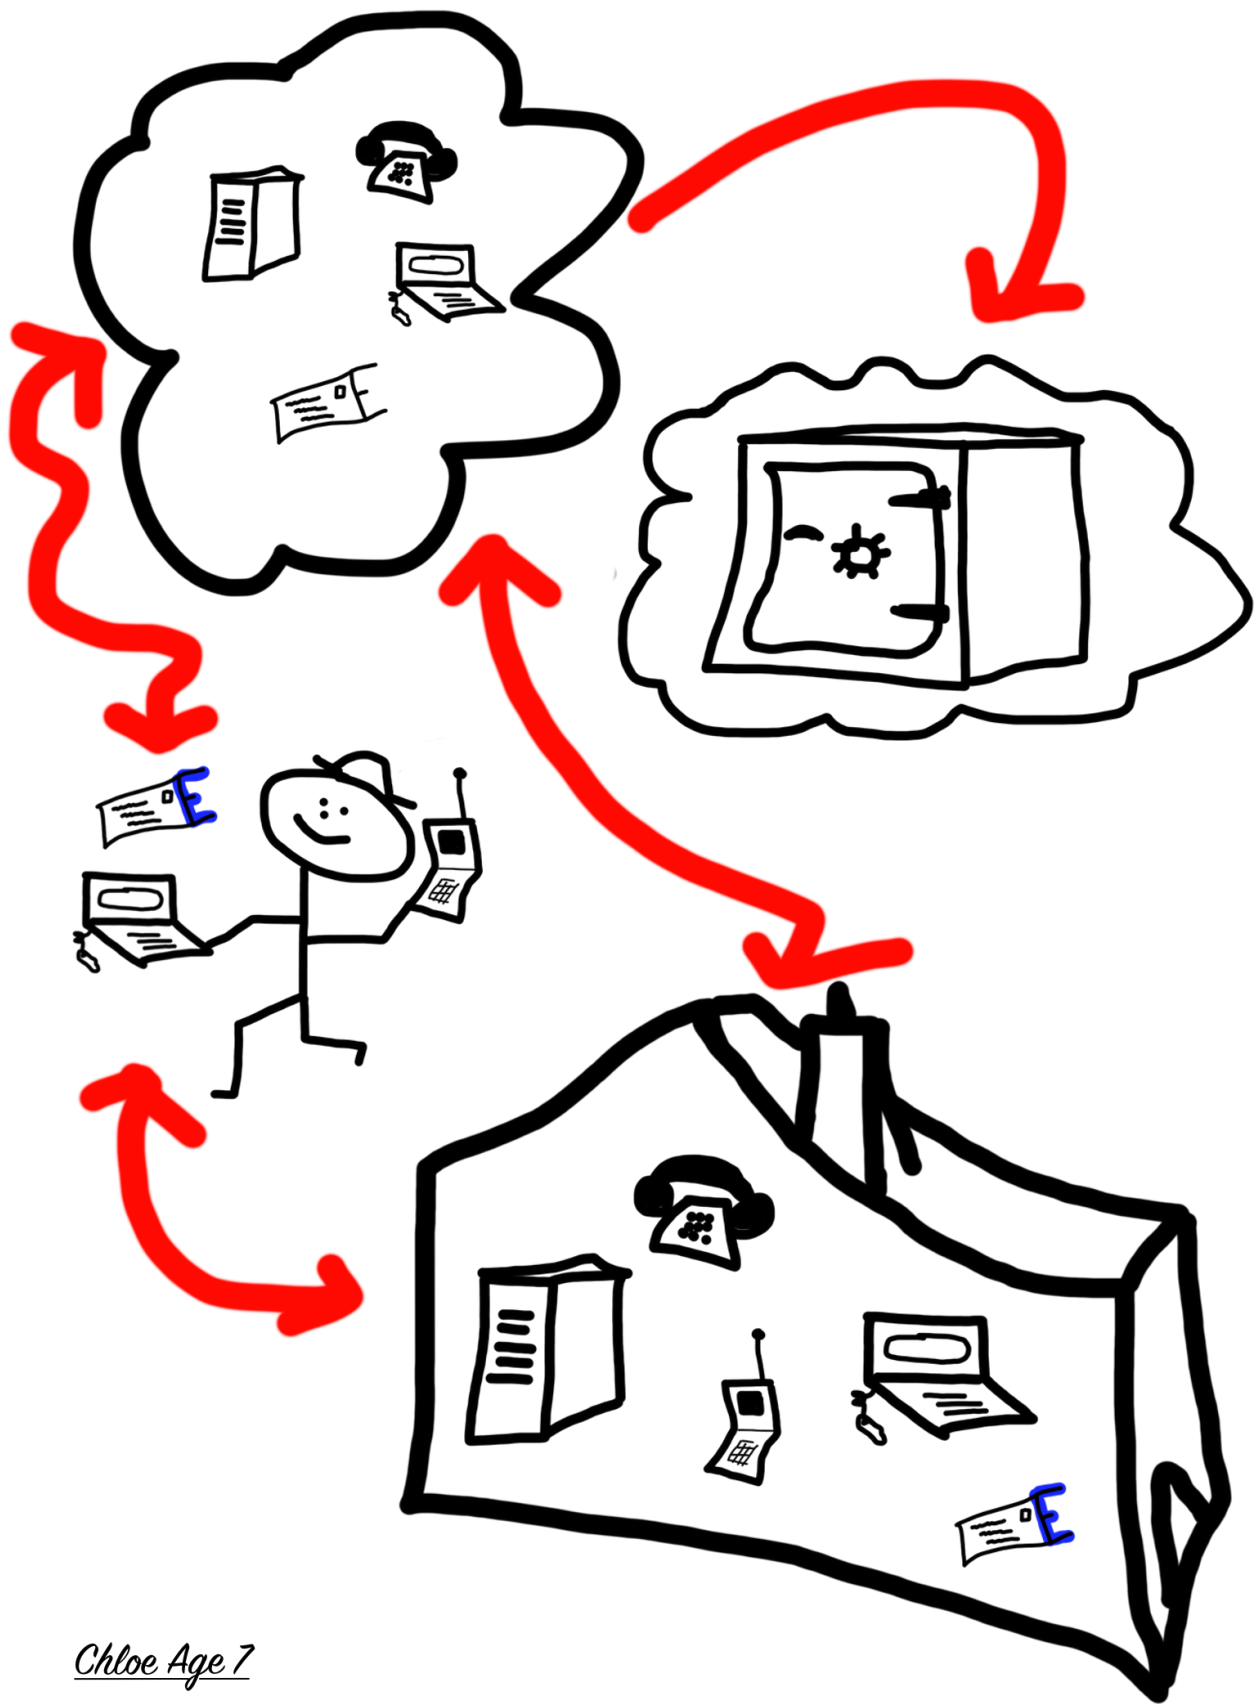

Wilbert would like to know when things went wrong he could count on someone who knew what they were doing - the wise old EO could well be the answer

Having a Service Level Agreement saves so much time and money. Can you afford an IT person full time with all the skills required? If so then he still has 6 weeks holiday a year, and may become ill just as your systems go down. How will you cope?

We have a team available 24/7/365 who will jump to an incident, but because your systems and pc's are being monitored and preventative maintenance carried out then the typical situation mentioned above is usually avoided.

We can organise an SLA to suit you. Real Time Monitoring, Backups, Cloud Backup and or Data Storage plus on-site visits are all available.

Please call one of our team on 0141 370 7200 to put your mind at ease.

*Chloe Age 7*

Wilbert got Chloe to draw her idea of how it all works - he suspects she has already been to the wise old EO

# Services Provided
